ABOUT ME

Computer Engineering graduate with a strong focus on Artificial Intelligence, backend development, and data-driven solutions. I am passionate about building robust and scalable software and exploring how Machine Learning can be effectively integrated into real-world applications.

My experience combines software engineering and AI, with a particular interest in backend systems, scalable architectures, and Machine Learning. I enjoy tackling complex technical problems, writing clean and maintainable code, and continuously learning and exploring new technologies.

WORK EXPERIENCE

Odins <https://odins.es/>

City: Murcia | **Country:** Spain

[08/01/2025 - 01/07/2025]

Software developer

- Researched, developed, and integrated a payment module for PrestaShop using GNU Taler
- Configured backend merchant systems, managed databases, and integrated plugins via REST endpoints
- Conducted comprehensive end-to-end testing of payment and refund flows to ensure system reliability
- Managed version control and CI/CD workflows using GitLab, and produced detailed technical documentation (including video materials).

Clínica EGOS

City: Barcelona | **Country:** Spain

[01/03/2026 - Current]

- Development and maintenance of internal web and mobile applications using React, TypeScript and AWS services.
- Design and implementation of new features, interfaces and role-based functionality for different business areas.
- Development of backend functionality and cloud integrations using AWS Amplify, AppSync, DynamoDB, Cognito and Lambda.
- Integration of external services and APIs, including social media and analytics platforms.
- Bug fixing, testing, performance improvements and maintenance of existing systems.
- Collaboration on the design and evolution of the company's internal digital platforms.

EDUCATION & TRAINING

[01/09/2022 - 31/05/2026]

Bachelor's Degree in Computer Engineering (Specialization in Computation)

University of Murcia (UMU) <https://www.um.es/>

City: Murcia | **Country:** Spain | **Level in EQF:** 6 | **Type of credits:** ECTS | **Number of credits:** 240 | **Thesis:** Simultaneous Evolution of Base Learners, Voting Weights, and Feature Subsets for Regression Ensembles

[01/09/2026 - 31/05/2027]

Master's Degree in Artificial Intelligence

University of Murcia

City: Murcia | **Country:** Spain | **Level in EQF:** 7

LANGUAGE SKILLS

Mother tongue(s): Spanish

Other language(s):

English

LISTENING: C1 **READING:** B2 **WRITING:** B2

SPOKEN PRODUCTION: C1 **SPOKEN INTERACTION:** C1

French

LISTENING: B1 **READING:** B1 **WRITING:** A2

SPOKEN PRODUCTION: A2 **SPOKEN INTERACTION:** A2

SKILLS

Machine Learning | Python | Deep Learning | Pandas | Numpy | Scikit-Learn | Ensemble Methods |
Computer Vision | Evolutionary Algorithms | Predictive Modeling | Docker | RESTful APIs | Microservices |
AWS | GCP | Git (Git Hub, Git Lab) | CI/CD | Algorithms

CERTIFICATIONS

- [Amazon Web Services (AWS),
01/07/2025]
- [Google Cloud Skills Boost,
06/07/2025]
- [Google Cloud Skills Boost,
13/07/2025]
- [Google Cloud Skills Boost,
20/07/2025]

AWS Cloud Practitioner Essentials

Infrastructure in Google Cloud

Cloud Computing Fundamentals

Networking & Security in Google Cloud

PUBLICATIONS

[2026]

Simultaneous Multi-Objective Evolutionary Optimization of Heterogeneous Ensembles, Learner-Specific Feature Subsets, and Aggregation Weights

Reference: Galván, J.; Sánchez, G.; Jiménez, F. (2026). Simultaneous Multi-Objective Evolutionary Optimization of Heterogeneous Ensembles, Learner-Specific Feature Subsets, and Aggregation Weights. Algorithms, 19, 681.

Published research on a multi-objective evolutionary approach for heterogeneous regression ensembles, jointly optimizing model selection, learner-specific feature subsets, and aggregation weights. The proposed approach was evaluated across multiple real-world regression datasets and compared with conventional ensemble and feature-selection strategies.

RECOMMENDATIONS

Name: **Rafael Marin-Perez** Internship Supervisor at OdinS

Professional reference regarding my performance during the Software Development and Cybersecurity internship, specifically my work researching and integrating GNU Taler into PrestaShop.

Email: rmarin@odins.es

Name: **Fernando Jiménez** Bachelor's Thesis Supervisor at University of Murcia

Academic reference regarding my Bachelor's Thesis on Ensemble Methods and the subsequent scientific paper submitted to the 'Algorithms' journal.

Email: fernan@um.es
